

Dear Electric Utility Professional.

We are pleased to provide the following COMMISSIONING APPLICATION NOTE. It shows the versatility of the DayCor® Corona Detection Cameras, high-lighting the cost savings available from its use.

This note pinpoints the importance of using the DayCor® Solarblind UVc Corona and Arcing detection camera during the Commissioning of new construction, upgrading and repairs of substations and overhead lines before the repaired or new equipment are put in service.

Top ten reasons why the DayCor® Corona Cameras are essential for the Electric Utilities during the Commissioning process.

- Reveal inadequate design
- Reveal missing components
- Reveal wrong hardware installations
- Reveal mismatching components
- Pinpoint problems early
- Find damaged mistreated components
- Check the equipment thoroughly before putting it online
- Check for problems when contractors are on site
- Efficiency and money saving
- Guarantee full customer satisfaction

We Rent the Small and Lightweight DayCor® Superb™

The early detection of Electrical Corona is extremely important to keep the integrity of the electrical grid.

The DayCor® Superb™ Solarblind UVc Corona Detection Camera Systems makes the detection of Corona easy during daytime conditions even in bright sun-light conditions. The DayCor® is the most important tool available to the Electric Utility Industry in its quest to improve the Electrical Grid by finding and correcting Electrical Corona Problems.
