

ELECTRICAL CORONA!

Dear Electric Utility and Surveillance Professional.

**It is Invisible! It can bring down a 500 kV line! It can start a Flashover!
It can eat through a Polymer insulator until it breaks! It produces extremely
corrosive Nitric Acid when in a humid atmosphere!**

It is not a friend of the Electric Utility Grid!

But a Solarblind Corona Detection Camera is!

**Rent the DayCor® Superb™ from us at Eklund Infrared
Inc. and Detect Corona Problems early and easily.**

**The DayCor® Bispectral UVc Corona Camera will detect
Electrical Corona and Arcing in full daylight!**

**It will pinpoint the exact location of the
Corona with ease.**

It is simple to operate, practical and efficient.
Use it to detect contaminated or cracked
insulators on overhead lines or in Substations.

Call or write us at EKLUND INFRARED/Eklund Innovation Inc., your UVc Corona Camera People! We rent the DayCor® Superb™ and we provide Corona inspection services. **Check with us on our monthly and weekly rental prices.** Longer terms are available.

Eklund Infrared/Eklund Innovation Inc. is your Supplier of the affordable Helicopter mounted SweSystem 4-axis Gyro stabilized Gimbal System Cameras, including Calibrated IR, HD Television Video, High Resolution Digital Still Camera with remote Zoom and more.
