

Dear Surveillance, Electric Utility, Helicopter and IR/UVc Professional.

We had our Airborne Gimbal Camera Systems on display at Heli-Expo 2013 this month in Las Vegas, NV.

On display were the latest EIR/SweSystem **200HDV-ENG** (7.8" Diameter) and the EIR/Swe **300 Triple**. Please see the latest specification sheets attached in PDF format.

Other EIR/Swe 4-axis 25 microRadian stability Gimbal Camera Systems available are: 200LEHD, 300HDV (ENG), 400 Quad, 400LE, 400HDIR, 400HDV (ENG) 5-axis, and more. The small 200LEHD can be equipped with an HD Video Camera with 30x optical zoom plus one regular FOV and one telephoto lens equipped LWIR camera. (Total 3 cameras in the gimbal, very cost effective)

Above left shown is the EIR/SWE 200 HDV with 30x optical zoom!

An EIR/SweSystem high stability 4-axis gimbal camera system (with fiber-optic high precision laser-gyros) consists of a 2-axis outer gimbal ring for the first stage stability and high slew rate plus an inner 2-axis gimbal ring for exceptional stability.

5th axis roll stabilization is available for some of the 200, 300 and 400 systems.

Above right shown is the fully equipped EIR/SWE 300 Triple HDI

The EIR/SWE 400 HDV (ENG & Filming) 5-axis gimbal system is available with a 3-chip High Definition 1080P Broadcast camera package.

We have supplied gimbal camera systems to most types of helicopters, R44 and up, smaller fixed wing aircrafts i.e. Cessna 207 and to high performance business jets such as the 3-engined Falcon. STC'd mounts are available from Meeker Aviation or Tyler to name a few.

One customer have installed, on the rear of a BMW motorcycle, an upside down 400 HDV 5-axis system with a Broadcast 3-chip HD Camera for bicycle races coverage! We can supply this type of configuration for other vehicles and boats (or ships) or pole mounts.

EKLUND INFRARED/Eklund Innovation Inc. represents SweSystem AB Gimbal Camera products in the USA and Canada.

Once again, thank you for visiting our display at Heli-Expo 2013.

We would be interested in providing you with an EIR/SWE Gimbal Camera System for HD Video, high resolution Long Wave Radiometric 1024x768 pixel Infrared Camera, UVc Corona Detection Camera or other payload combinations of your choice. The EIR/SWE 400 Quad is perfect for power line patrol, pipeline inspection, fire detection plus high resolution still picture recording (Nikon D800 36 MP with GPS)

Please contact us for the latest information on the camera system we can provide. The EIR/SWE Gimbal Cameras are well proven systems flying all over the world.

EKLUND INFRARED/Eklund Innovation Inc. **rent and sells the Ofil DayCor® Superb™ UVc Corona and Arcing Detection Cameras** made by Ofil Ltd. We rent on a **weekly or monthly** basis. Please contact us for pricing and availability.

Innovation, Performance, Reliability, Excellence.

Sincerely Yours, Jan K. Eklund
